◆ HOW TO READ THIS INVENTORY · SCORING & METHODOLOGY · FINE PRINT

◆ Victory Real Value™ (VRV™) – How It's Calculated

VRV™ is Victory Spirits' proprietary market valuation – an independently computed estimate of the current wholesale market value for each lot. It is fully independent of our wholesale price. VRV is a weighted composite of four inputs: confidential reference pricing from three or more major producers and industry valuation platforms, independent broker listings, verified closed trade data, and our POMM quality adjustment. Each source is weighted by recency and reliability. The result is updated continuously as new market data is received.

NEW Confidential Producer Reference Pricing

Confidential reference pricing sourced from three or more major producing distilleries and industry valuation

NEW Independent Broker Listings

Active asking prices from wholesale brokers and independent marketplaces, normalized by producer, mash, and age band. Updated as new listings are received.

platforms. One weighted factor in the VRV composite.
Updated monthly or quarterly depending on the source.

🔒 Verified Closed Trade Values

Confirmed arm's-length transactions from VS closed sales and documented third-party trades within 90 days.
Highest-reliability input.

★ POMM Score Adjustment

Producer · Origin · Maturity · Mash. VS proprietary scoring applies a quality premium or discount to the market base.
Updated continuously.

Reading the VAR indicator

The ↑ / ↓ figure on each listing is the spread between our wholesale price and VRV™. A **positive variance (↑)** means the lot is priced below estimated market – representing potential value to the buyer. Lots showing **100% or greater variance** carry the High Value Deal designation. A **negative variance (↓)** reflects a lot priced at or above estimated market, which may reflect unique provenance, restricted availability, or premium positioning.

VRV™ is an analytical estimate – not a guarantee of market value, liquidity, or future performance. Only a fully executed and funded Purchase Agreement locks in price and availability.

🔑 No Surprises Pricing
